

LogoKokpit

LogoKokpit

LogoKokpit

A company-level decision and early-warning cockpit for LOGO ERP data.

Highlights

Collections and risk

Overdue receivables, customer risk and cheque portfolio on one dashboard, with threshold alerts.

Five roles, five screens

Separate dashboards for the owner, CFO/accounting, sales, stock/purchasing and the accountant — everyone sees the answers to their own questions.

Multi-company for accountants

Compare client companies in one table with a risk score and trend line, and bring the ones needing attention to the top.

Drill-down tables

Lists such as account balances and critical stock can be grouped, sorted and filtered, and exported to Excel and PDF.

THE PROBLEM

What do managers see too late?

- Cash and collections status is known only after asking accounting for a report.
- Each department prepares its own spreadsheet; the numbers do not match.
- Risky customers or shrinking stock are noticed after the problem grows.

THE SOLUTION

What does LogoKokpit do?

- Reads LOGO ERP data and offers ready dashboards for owners, finance, sales, stock and collections.
- Drills down from a KPI to the underlying document.
- Alerts you when a threshold is crossed.

WHY IT IS DIFFERENT

The difference

- Never touches your Logo data; read-only.
- Per-company and consolidated views for multi-company groups.
- Users only see the companies, branches or accounts they are authorised for.

Frequently asked questions

Which Logo products does it work with?

Logo Tiger and Logo GO company databases.

Does it write anything to my Logo database?

No. The cockpit reads data through the ERP Bridge agent's read-only endpoint, using templated, parameterised queries.

Do I need to expose my database to the internet?

No. The connection runs through the ERP Bridge agent installed on your Logo server.

Can I follow several companies?

Yes. Several companies are defined in one installation, and the accountant screen compares client companies by risk score.

Product facts

WHO IT IS FOR

Executives, finance teams and financial advisors

ACCESS

Installed on your server or hosted

SETUP

Installation and initial setup by our team

COMPATIBILITY

LOGO ERP (Tiger and Go families)

LICENCE

Based on the number of companies and users
