

Pre-Close Data Check

Quietly checks the health of your Logo data every month

Finds inconsistencies before closing and tracks whether each finding was fixed. It never writes to Logo; your data stays in-house.

Highlights

40 accounting checks

Receivables vs ledger, VAT, stock and cost, cash and bank, year-end and record integrity, scored across nine areas.

Monthly health score

The same rules every month, a 0–100 score, red/amber findings and an Excel detail list.

Follow-up report

Were last month's red findings closed this month, still open or new — at a glance.

Read-only and on-premises

The Logo connection only reads; scans and archive stay on your server, only your own e-mail report leaves.

THE PROBLEM

What goes wrong at closing?

- Reverse balances, unmatched accounts or open vouchers are noticed only on filing day.
- The checklist lives in someone's head; the same mistakes repeat every month.
- Nobody tracks whether a finding was actually fixed.

THE SOLUTION

What does the check do?

- Reads your Logo records on your server every month and runs 40 accounting checks.
- Lists findings by severity, together with the related voucher and account.
- Gives a monthly health score and separates closed findings from new ones.

WHY IT IS DIFFERENT

The difference

- Read-only; it never writes to Logo.
- Data never leaves your server; the report is produced on site.
- Your accountant and your finance team work from the same report.

Frequently asked questions

Does it change my Logo data?

No. The connection is read-only and every query runs inside a transaction that is rolled back; the product never writes to Logo.

Which Logo products does it support?

It is tested on Logo Tiger; Tiger 3 and GO compatibility is being verified in the pilot. Tell us your product and version when you apply.

Where does my data go?

Nowhere. Scans and the archive stay on your server; only the report sent through your own mail server and the licence check leave it.

Is this an accounting service?

No. It is a data-quality and record-consistency check; corrections are decided by your accounting team and accountant.

Product facts

WHO IT IS FOR

Finance manager, accounting team, financial advisor

ACCESS

On-premises Windows service + browser interface

SETUP

Single installer, 6-step wizard

COMPATIBILITY

Logo Tiger (Tiger 3 / GO being verified), SQL Server

LICENCE

Manual scans are free; scheduling, e-mail reports and e-Ledger monitoring are licensed
